Alkon Corp. Fittings, valves and flow controls

Allenair Corp. Stainless steel cylinders, index tables

Altaflo High performance fluoropolymer and fluoroplastic (Teflon®) tubing and pipe

American Cylinder Co., Inc.
Flow control valves and pneumatic cylinders

Balluff Sensors, linear transducers, RFID systems and connectors

Bestobell Process measurement and valves

Colder Products Company (CPC)®
Plastic and metal quick couplings, fittings, tube connectors

Compact Automation Products, LLC
Pneumatic and hydraulic cylinders, linear actuators

D & B Custom Wiring
Electrical control systems and wiring harnesses

Destaco Material handling tools, automation equipment and clamps

DynaQuip Controls®
Automated valves, actuators, ball and butterfly valves

Enerpac® High pressure hydraulic products including tools, cylinders, pumps, valves and presses

Freelin-Wade® Plastic tubing in polyurethane, nylon, polyethylene, PVC and others

Gast Manufacturing, Inc.
Air compressors and vacuum generating products

Gems Level switches, pressure switches, pressure transducers, flow switches, miniature solenoid valves, proximity switches and liquid level control units.

Industrial Robot Supply Refurbished articulating robots. Parts, automation and welding cells

John Guest®
Valves, polyethylene tubing, push-in fittings

Marsh/Bellofram
Electronic pneumatic I/P, E/P and P/I actuators

Master Pneumatic, Inc.
Filters, regulators and lubricators

Mem-Co Fittings, Inc. Miniature barbed air fittings

MiR Autonomous mobile industrial robots

New Age Industries Vinyl, polyethylene tubing

Parker Autoclave Engineers
High pressure valves, pumps, fittings and tubing

Parker Finite Air coalescing filters

Parker Instrumentation

Stainless steel fittings, valves, manifolds and tubing

Parker Racor Air and oil filtration for stationary, mobile and marine engines

Pinnacle Systems, Inc. Safety sensors, light curtains, controls for industrial machine guarding systems

Rethink Robotics High-performance, smart, adaptable and collaborative robots

Robohand, Inc. Pneumatic and electric grippers, linear and rotary actuators

Rotomation, Inc.
Rotary, stepping, indexing and pick-and-place actuators

Setra Pressure transducers, transmitters, industrial sensors

SS Metal Worx, Inc.
Feeder bowls, hoppers, inline feeders, conveyors, gravity tracks and high-performance escapements

TPC Control valves, actuators, filters, regulators, lubricators and fittings

TRD Manufacturing, Inc. Air cylinders, air/oil tanks, linear alignment couplers and presses

TSlots Modular structural aluminum extrusions, linear slides, fittings and accessories

Turn-Act Rotary actuators, valve actuators and custom cylinder products

Twin Tower Engineering, Inc. Point-of-use desiccant and membrane compressed air dryers

Universal Components, Inc. (UCI)
Valves, filters, mufflers and gauges

Valley Industries Pressure and temperature gauges, fittings, ball valves and accessories

Wika Pressure gauges, thermometers, and transducers

World Magnetics Pressure and vacuum switches and sensors, analog and digital magnetic heads

Innovative Motion Control and Fluid Handling Products and Solutions

From Off the Shelf to One of a Kind

Custom Sub-Assemblies

The process of assembling components from a variety of sources is potentially time consuming and often inefficient.

Allegheny Fluid Power / RG Group

specializes in providing cost-reduction solutions by engineering an array of pneumatic, electrical and hydraulic components and manufacturing a pre-packaged sub-assembly. This value-added service results in significantly improved productivity due to reduced assembly time.

- Valve stands
- Pneumatic panels
- Filter skids
- Tube assemblies
- Manifold assemblies
- Off line filtration
- Filter carts
- Component assemblies

Custom Power Units

Staffed with fluid power certified engineering personnel, **AFP/RG Group** can design and build a custom power unit in any size and configuration to meet your exact specifications.

Field Service and Repairs

AFP/RG Group's team of repair and field service technicians are certified as hydraulic and pneumatic experts by the National Fluid Power Association.

Our technicians go to your site to repair, install or perform preventative maintenance with the right equipment and technical

expertise. We can repair any pump, cylinder or valve component, regardless of manufacturer - quickly, with performance guarantees.

Turn-key Solutions

AFP/RG Group offers complete turn-key services. Simple or complex, we can design, manufacture and install an automated system to meet your exact specifications. Our custom design will work with your machine or process. Our many years of experience and expertise in automation and controls will ensure that your next project will be completed on time and within budget. We offer outstanding service, quality, technology and equipment to meet the increasingly diverse demands of our customers.

- Hydraulic and pneumatic control systems
- Electric control systems
- Design and engineering
- Structural engineering
- Pick & place
- Installation
- Troubleshooting
- Electrohydraulics
- Computer controls
- Programmable controls
- Automated machinery
- Machine rebuilds
- Preventive maintenance

Design and Consulting

AFP/RG Group provides technical assistance on system design and specific product applications. We can coordinate with your design team to develop cost-effective solutions in pneumatic, hydraulic and electro-mechanical motion control applications. Additionally we can provide in-house CAD drawing designs and application assistance for structural framing components. Design engineering services can also be supplied as an individual **value-added service**.
