

CASE STUDY

Customer Profile:

Large OEM

Opportunity:

Design and build diesel engine-driven hydraulic power units to power motorized hose reels for fire-fighting use.

Result:

RG Group built and delivered 35 hydraulic power units. Construction of the units began in our facility in York, PA in August with the final unit being delivered in December.

Advantage:

RG Group's engineering expertise was an ideal complement to the customer's own engineering capabilities. In this joint effort, we were able to manufacture the ideal power unit for this highly specialized mobile application.
