

FBO-10 and FBO-14

Fuel Filter/Water Separator For High-Flow Applications

These versatile housings have three filter options to meet various requirements: a fuel filter/water separator, a silicone treated filter, and a water absorber. For fuel dispensing applications the fuel filter/water separator filter is recommended.

FBO-10 and FBO-14 filter assemblies are designed to meet the toughest hydrocarbon refueling conditions and designed for easy cartridge changeouts.

The FBO assembly can be used on mobile refuelers or installed in refueling cabinets. The FBO unit can also be used for diesel fuel dispensing pumps, as a primary fuel filter/water separator for large diesel engines, or as bulk fuel handling, fuel transfer, and other higher flow applications.

Product Features

- Die-cast aluminum head
- Steel filter bowl assembly
- Powder coated components
- Mounting bracket
- Locking ring collar “no V-clamps”
- 1.5” NPT inlet and outlet
- Viton® seals for compatibility to various fuels
- Designed to withstand a max pressure of 150 PSI (10 bar) and a max temperature of 240°F (115°C)
- Manual drain valve (1/4” NPT)
- Manual vent valve
- Sight glass (1/2” NPT)
- 120 volt AC explosion proof heater option available
- Wide variety of accessories, filters and applications available

Note: Viton® is a registered trademark of DuPont™

ENGINEERING YOUR SUCCESS.

Application

FBO assemblies are specifically designed to meet the filtration requirements of today's high pressure common-rail diesel injection systems. The unit is used for fuel dispensing pumps or as a primary fuel filter/water separator on large diesel engine applications.

FBO-10 and FBO-14 filter assemblies were designed to meet the toughest conditions and offer ease of filter change outs. The FBO assembly can flow from 10 GPM (38 LPM) to 75 GPM (284 LPM), depending on which model, filter, and type of fuel to be filtered.

The assembly features a "locking ring collar", which attaches the filter housing to the aluminum die

cast filter head with four bolts. The slotted "locking ring collar" allows maintenance personnel to hand loosen the four collar bolts, rotate, and lower the bowl assembly for filter changeouts.

With a new filter cartridge installed, simply raise the bowl and rotate into position on the locking ring and hand tighten evenly (evenly torquing the 4 closure bolts to 100 lb-in is highly recommended).

The closure hardware consists of stainless steel nuts, bolts, and washers with metal hand knobs for ease of maintenance. No wrenches or other special tools are required, allowing one person to easily change the filter cartridge (no V-band clamps are used).

Biodiesel Filtration

FBO assemblies are great for biofuel applications because of ease of service, rugged construction, and the optional electric heater.

Biodiesel is known to attack certain synthetic rubber compounds so Viton o-rings are used to prevent o-rings from swelling, softening, shrinking, or hardening.

Racor recommends using a thermostatically controlled electric heater in the head and/or filter bowl to help avoid biofuel waxing and gelling. Pour point suppressants and biocides are necessary for reliable operation.

FBO Commercial Application

FBO Commercial Application

FBO Commercial Application

New Additions

New to the FBO family of filters are the Racor heavy duty Fuel Recycler Cart and the FBO Duplex Stand. The filter cart polishes, cleans up, and recycles old or contaminated fuel. It can be used in preventative maintenance as a servicing unit. The all aluminum construction keeps it lighter for mobility purposes, while being durable and corrosion resistant for many years of operation.

By popular demand the FBO Duplex Stand was designed with continuous duty applications in mind. The Duplex Stand assembly allows the isolation of one filter at a time for servicing while still in operation.

FBO Duplex Stand

Replacement Filters

Filters are used to protect the OEM supplied fuel system.

Water Separator

Water separator filters remove water and contaminants from hydrocarbon fuel streams and are the most popular filters.

Silicone Treated

Silicone treated fuel filters remove particle contaminants down to one micron.

Silicone filters can also be used upstream, before a fuel filter/water separator, to extend filter life.

Water Absorber

Water absorber filters absorb water and filter out contaminants from diesel fuel and other hydrocarbon streams.

FBO-14-BKT-25F	FBO 60341	X	X	X	X
FBO-14-BKT-25FW	FBO 60344	X	X	X	X
FBO-14-BKT-25FWS	FBO 60338	X	X	X	X
FBO-14-DPL-DUPLEX	Order Separately	X	X	X	

¹Note: Includes 120 volt AC explosion proof heater for stationary applications only.

Additional Information

The Racor mobile fuel polishing cart (FC-20-1-120V or FC-20-1-120V-KIT) are built with the robust FBO-14-DPL technology and are stocked and available. See brochure # 7872 for more details.

For more information of filtration in fuel dispensing applications, see brochure # 7648.

Additional information is available for high flow fuel filtration application in brochure # 7537.
