Type M93X.D1 All-Welded System (AWS)

WIKA Datasheet M93X.D1

Type M93X.D1 all-welded gauge/diaphragm seal systems are a drop-in retrofit for existing gauges. This assembly eliminates all potential leak paths and has a tamper-resistant construction. The all-welded system is ideal for installations where tightly controlled fugitive emissions and safety are a concern. The M93X.D1 is well-suited for applications in the chemical, petrochemical and process industries.

Design

This all-welded gauge assembly is constructed using WIKA gauge model number 23X.34 and diaphragm seal model number L990.34. The diaphragm is recessed within the all-welded seal body. The pressure gauge is back-welded to the seal upper housing to eliminate another potential leak path. The threaded seal fill port has been removed to ensure a tamper resistantdesign. Additional process wetted materials, process connections, system fill fluids and accessories are available to meet the rigorous demands of most applications.

Standard Features

Construction

All-welded design

Pressure Rating, Maximum

1,500 psi and 5,000 psi

Ranges

Vacuum, compound and positive pressure up to 5000 psi (See selection table for detail)

Operating Temperature

0 to 300°F (-18°C to 149°C)

Ambient Temperature

-40°F to 140°F (-40°C to 60°C)

Type M93X.D1 AWS

Gauge Features

Dial Size

41/2" process gauge

Process Connection

1/4" NPT & 1/2" NPT male or female

Process Wetted Materials

316L stainless steel

Case Material

Fiberglass reinforced thermoplastic (Pocan®)

Case Fill

Glycerin (optional)

Window

Acrylic

Dial

White aluminum with black lettering

Pointer

Black aluminum

Accuracy

±0.5% of span

Temperature effect

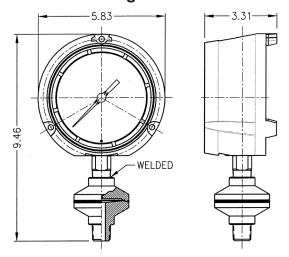

Process and ambient change, see Technical Data, page 1

System Fill Fluid

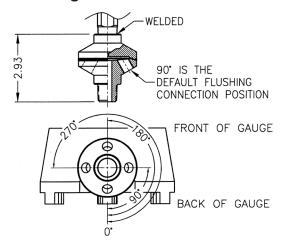

Silicone oil, KN68 - DC200-10cSt.

Identification: Engraved on upper seal housing

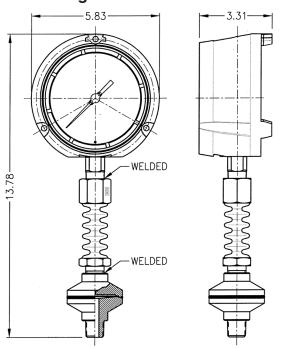

Standard Configuration

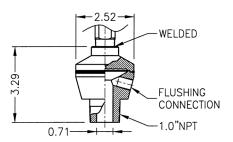

Flushing Port Location

4" Cooling Element installed

Ethanol Configuration

Technical Data

Overall weight: No case fill: 3.50 lbs. Case filled: 4.60 lbs.

Temperature effect²

Fill fluid	KN68	KN7	KN2	KN59	KN21	KN3.21

	M93X.D1 Selection Guide - Page 2							
Field no.	Code	Description Description						
		Options - (see note 4)						
	FGL	Glycerin, 99.7% case fill - change model # to M933.D1						
	FS1	Silicone 1000cSt case fill - change model # to M933.D1						
	LSG	Laminated safety glass window						
	XMT	Material Certificate 3.1 EN10204 (metal only)						
10	XNC	Wetted Parts NACE (MR0175/MR0103 Year 2009) compliant						
10	WSS	Instrument tag, stainless steel						
	RS3	Restrictor, SS, 0.3 mm orifice						
	PDP	Drag pointer, red (standard)						
	CE4	4" Cooling element - (see note 5)						
	CE8	8" Cooling element - (see note 5)						
	PLG	Provide flushing port plugs						

Notes:

- 1) Plugs are not supplied with flushing ports as standard.
- 2) Diaphragm material should match the lower housing material. Please contact the factory for exceptions.
- 3) Glycerin (07) is not available for vacuum & compound pressure measurement ranges. Consult factory for exceptions.
- 4) List options in alphabetical order at the end of the configuration code.
- 5) Cooling element are only offered with 316L stainless steel upper housings.
