

TAME YOUR WAREHOUSE LIKE A BOSS!

AutoGuide mobile tuggers and forklifts offer improved safety, easy deployment and increased efficiency of industrial and warehouse material handling. Unlike most players in the industry, AutoGuide's products aren't manufactured as a retrofit kit to existing equipment, but instead as a standalone platform. This means shorter lead times and faster ROI.

Designed to help you improve your logistics with the most-profitable economics, **we're transforming how the world moves.**

proud
AUTOMATION
www.rg-robotics.com

AutoGuide is a leading supplier of high payload autonomous mobile robots (AMRs). They're used by organizations of all sizes – across a broad spectrum of industries – to improve operational workflows.

Max N10 Mobile Robot Platform with SurePath Natural Feature LiDAR Navigation

Flexible & Scalable

- Infrastructure-free SurePath guidance system uses no magnetic tape or RFID tags.
- Hybrid operations with onboard driver platform

Accurate & Repeatable

- Docking accuracy +/- 0.5 cm using Ultra-High Resolution LiDAR
- Maximum utilization with automatic opportunity charging

Maneuverable & Safe

- Highest speed in the industry; travels up to 4 miles per hour in autonomous mode
- Non-contact collision avoidance system; ANSI compliant at full load/full speed

Easily Deployed

- Map the environment using the vehicle, define stations and paths in SurePath
- Onboard Operator GUI for local control, system status and diagnostics
