

GAST

A Unit of IDEX Corporation

GAST... Tough, Reliable

Rotary Vane Vacuum Pumps and Compressors

Pulsation-free, minimal vibration with long service-free life for oilless or lubricated applications.

Air Motors and Gear Motors

Rugged and reliable, a broad range of models are available in lubricated, lubricated stainless steel and oilless styles.

Regenerative Blowers

For high-volume vacuum or compressed air applications. Several models are available with explosion proof motors for soil vapor extraction applications.

Piston Compressors and Vacuum Pumps

Built to withstand rugged operating conditions for high-pressure, oilless operation.

Roc-R Compressors and Vacuum Pumps

GAST's ROC-R rocking piston line combines piston pump durability with diaphragm pump efficiency, proven outstanding performance and flexibility.

Diaphragm Compressors and Vacuum Pumps

Compact, quiet source of vacuum or pressure. Miniature styles are ideally suited for a variety of light-duty applications.

Linear Compressors and Vacuum Pumps

Extremely quiet, highly efficient operation and simple maintenance due to principles of electromagnetic oscillation.

Vacuum Generators

Low cost, compact alternative to traditional vacuum pumps in single and multi-stage designs.

YOUR GAST Solutions Source

RG Group provides innovative air solutions to give you a competitive edge in today's global manufacturing environment. From air motors to vacuum generators, GAST produces the pneumatic products that leading OEM's rely on.

60 Years
Trusted Expertise

Engineered Solutions

Innovation doesn't come with a part number. Your problems are not the same as the next guys'... and your solution shouldn't be either. RG Group has spent over 55 years concentrating on motion control, specializing in creative solutions to some very interesting and complex system requirements.

Let us help you find the right GAST solution to meet YOUR requirements.

Applications

Pharmaceutical

- Processing equipment
- Analytical equipment
- Packaging Equipment

Biotech

- Bio-mass aeration
- Gas generation
- Bio-decontamination

Energy

- Fuel atomization
- Combustion enhancement

Medical/Dental

- Compressors
- Diagnostic Equipment
- O2 Generation
- Sequential Compression
- Vacuum (aspiration)

Environmental

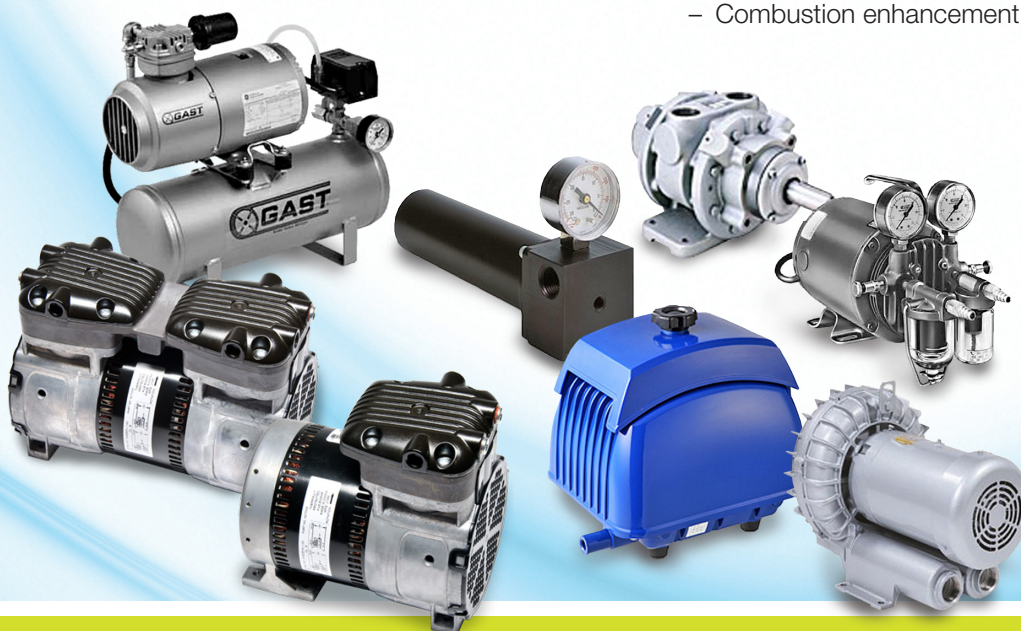

- Water/sewage treatment and sampling
- Air quality improvement and sampling
- Soil Vapor Extraction
- Water aeration

Defense

- Inflatable structures
- Portable medical equipment
- Air samplers for toxic gasses and bio weapons

Food and Beverage

- Processing and production equipment
- Mixing, aeration and sampling
- Packaging and bottling

RG Group is now an Authorized *GAST* Repair Center
